**Amanda Hensman-Crook, Consultant MSK physiotherapist, National Health Education England AHP clinical fellow**

Amanda is a Consultant MSK physiotherapist in Primary care and a Fellow of the Chartered society of Physiotherapy. She is currently seconded to Health Education England as their AHP National Clinical Fellow leading on the training pathway to First Contact and Advance Practice in primary care and the supervision and governance for the New AHP roles in primary care.

She was central to the development of First Contact Practice from 2014 and created the national data template for standardised data collection for primary care computer systems in England to provide evidence of impact.

She is passionate about using innovative change to drive quality improvements to improve patient safety and create cross system efficiency. She also loves a challenge which keeps her in primary care!

**Dr Neil Langridge, NHS Consultant Physiotherapist Southern Health NHS Trust**

Neil is a Consultant Physiotherapist in Hampshire, Visiting Research Fellow at the University of Winchester, education lead for the MACP and President of the APPN. He has led a number of national projects for Health Education England and supported numerous Universities in post graduate teaching and examining. He has published in peer reviewed journals, book chapters and has presented internationally in a range of topics. He is currently supporting much of the work surrounding advanced MSK practice and has contributed across two national frameworks.

**Ashley James, National Clinical Education Lead, Connect Health**

Ashley has recently moved into the role of National Clinical Education Lead with Connect Health. He is also a visiting lecturer at Manchester Metropolitan University where he is working through his PhD and is part of the Advanced Practice and FCP Supervisor training team. Ashley has worked clinically for the past 11 years across different sectors within MSK practice including occupational health and professional sport.

Ashley is passionate about quality, evidence informed care for patients and feels having access to the right education for clinicians is fundamental to implementing this in practice. His development of the Academy is an attempt to provide a structured curriculum of education and a pathway for a multi-professional workforce that supports their career progression.
